

SUBJECT INDEX

Volume 1, No.1 (Summer 1970) through 2018-2.

NOTE ON USE OF THIS INDEX.

A few comments about using this index. In compiling this index, there has been no attempt to evaluate the importance of particular names and I decided to leave that to the researcher who is using it. Instead, I have tried to make it as complete as possible, but a few names that I viewed as particularly peripheral and obscure were not included. Also, there is some redundancy such as some Lawyers are listed under that heading and also under individual names. The same is true of some Physicians.

Large families (particularly when they are mentioned in a single article) are indexed under the family name and then by the individual names below. However, with regard to earlier and later articles, it is possible they are separately indexed so it is prudent to check both.

There was a particular problem with ladies maiden and married names. When both are available, I have indicated the maiden name by “(nee.....)” and the married name by “(m.....)”. Unfortunately, I admit that which was used and when was somewhat arbitrary and sometimes both the married and maiden names were indexed.

There also may be instances where the same individual is indexed under two names. This occurred when the two names were used in different articles and probably were the same person but I had no way of knowing. An example is “C. H. Belknap” and “Judge Belknap.” Although probably the same individual, I was not certain so both names were indexed.

In many instances, an individual’s name is used in connection with a ranch or company. For instance, W. T. Jenkins Company. Usually this is indexed under W. However, it would be prudent to also look under the surname, Jenkins. This is the case with ranches. Usually a name such as “Thomas Dean Ranch” will be indexed under Thomas. However, there may be instances when it is indexed as “Dean Ranch, Thomas” so check both possibilities.

The captions under photos have not been indexed. Hopefully, if I find time and have enough time left, that will be done some day.

I have tried to be as complete as reasonably possible because I realize this may be used years in the future by someone trying to do a family history or genealogy and do not want to disappoint them by omitting some ancestor.
